

Les puissances

$$6 \times 6^4 = \square \circ \square = \square$$

$$8^{11} \times 8 = \square \circ \square = \square$$

$$2 \times 2^5 = \square \circ \square = \square$$

$$4^2 \times 4 = \square \circ \square = \square$$

$$5 \times 5^9 = \square \circ \square = \square$$

Les puissances

$$6 \times 6^2 = \square \circ \square = \square$$

$$2 \times 2^9 = \square \circ \square = \square$$

$$1^7 \times 1 = \square \circ \square = \square$$

$$8^4 \times 8 = \square \circ \square = \square$$

$$5 \times 5^3 = \square \circ \square = \square$$

Les puissances

$$3^5 \times 3 = \square \circ \square = \square$$

$$9^2 \times 9 = \square \circ \square = \square$$

$$7^3 \times 7 = \square \circ \square = \square$$

$$1^6 \times 1 = \square \circ \square = \square$$

$$4^8 \times 4 = \square \circ \square = \square$$

Les puissances

$$7^5 \times 7 = \square \circ \square = \square$$

$$2^4 \times 2 = \square \circ \square = \square$$

$$3 \times 3^5 = \square \circ \square = \square$$

$$7^8 \times 7 = \square \circ \square = \square$$

$$4 \times 4^2 = \square \circ \square = \square$$

Les puissances

$$6^7 \times 6 = \square \circ \square = \square$$

$$8 \times 8^9 = \square \circ \square = \square$$

$$5^4 \times 5 = \square \circ \square = \square$$

$$3 \times 3^6 = \square \circ \square = \square$$

$$1^2 \times 1 = \square \circ \square = \square$$

Les puissances

$$2 \times 2^8 = \square \circ \square = \square$$

$$5 \times 5^7 = \square \circ \square = \square$$

$$6^9 \times 6 = \square \circ \square = \square$$

$$9 \times 9^6 = \square \circ \square = \square$$

$$4^3 \times 4 = \square \circ \square = \square$$

Les puissances

$$5^3 \times 5 = \square \circ \square = \square$$

$$2^3 \times 2 = \square \circ \square = \square$$

$$8 \times 8^7 = \square \circ \square = \square$$

$$4^5 \times 4 = \square \circ \square = \square$$

$$3^6 \times 3 = \square \circ \square = \square$$

Les puissances

$$8 \times 8^6 = \square \circ \square = \square$$

$$2^4 \times 2 = \square \circ \square = \square$$

$$6^8 \times 6 = \square \circ \square = \square$$

$$9 \times 9^4 = \square \circ \square = \square$$

$$1 \times 1^2 = \square \circ \square = \square$$

Les puissances

$$1^7 \times 1 = \square \circ \square = \square$$

$$3^5 \times 3 = \square \circ \square = \square$$

$$7^8 \times 7 = \square \circ \square = \square$$

$$9^2 \times 9 = \square \circ \square = \square$$

$$4^9 \times 4 = \square \circ \square = \square$$

Les puissances

$$3^5 \times 3 = \square \circ \square = \square$$

$$7 \times 7^9 = \square \circ \square = \square$$

$$9^7 \times 9 = \square \circ \square = \square$$

$$8^3 \times 8 = \square \circ \square = \square$$

$$2 \times 2^6 = \square \circ \square = \square$$

Les puissances

$$8^5 \times 8 = \square \circ \square = \square$$

$$6^4 \times 6 = \square \circ \square = \square$$

$$5^7 \times 5 = \square \circ \square = \square$$

$$4^3 \times 4 = \square \circ \square = \square$$

$$1^6 \times 1 = \square \circ \square = \square$$

Les puissances

$$5^8 \times 5 = \square \circ \square = \square$$

$$9^8 \times 9 = \square \circ \square = \square$$

$$1^9 \times 1 = \square \circ \square = \square$$

$$7^4 \times 7 = \square \circ \square = \square$$
